The Greatest Wonder of Modern

Times HOLLOWAY'S PILLS.

Persons suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir Samuel Baker, in his work entitled "The Nile Tributaries in Abyssinia," says 'I ordered the dragomen Mahomet inform the Fakey that I was a Doctor, and that I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as possessing unmistakable purgative properties they create an undeniable effect upon the patient, which satisfies him of their

DR. J. COLLIS BROWNE'S CHLORODYNE

(Ex Army Med. Staffi) IS THE ORIGINAL AND ONLY GENUINE.

CAUTION .- Vice-Chancellor Sir W. P. Wood stated that Dr. Collis Browne was undoubtedly the Inventor of Chlorodyne, that the story of the Defendant, Freeman, being the Inventor was deliberately untrue; which he regretted had been sworn to. Eminent Hospital Physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's. - See Times, July 12, 1864. The public, therefore, are cautioned against using any other than

DR. J. COLLIS BROWNE'S CHLORODYNE

Remedial uses and action. This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively, using it in great quantities in the

following diseases:-Diseases in which it is found eminently useful-Cholera, Dysentery, Diarrhoea, Colics, Coughs, Asthma, Rheumatism, Neuralgia, Whooping Cough, Cramp, Hys-

teria, &c. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne,--See Lancet, Dec. 31, 1864.

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay :- "Chlorodyne is a most valuable remedy in Neuralgia. Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when other remedies had failed."

BREAKFAST. "By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the properties of well-selected cocoa, Mr Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."-

(OZONIC OXYGEN) The New Curative Agent, and only Reliable Remedy for Nervous and Liver

This Phosphatic combination is pronounced by the most eminent members of the Medical Profession to be unequalled for its power in replenishing the vitality of the body, by its supplying all the essential constituents of the blood and nerve substance, and for developing all the powers and functions of the system to the highest degree. It is agreeable to the palate, and innocent in its action, while retaining all its extraordinary properties : and as a specific, surpassing all the known therapeutic agents of the present day for the speedy and permanent cure of-Nervous Prostration, Liver Complaints, Palpitation of the Heart, Dizziness, Noises in the Head and Ears. Loss of Energy and Appetito, Hypochondria Female Complaints, General Debility, Indigestion, Flatulence, Incapacity for Study or Business, Sick Headache, Lassitude, Shortness of Breath, Trembling of the hands and limbs, Impaired Nutrition, Mental and Physical Depression, Consumption (in its first stages only), Timidity Eruptions of the Skin, Impaired Sight and Memory, Nervous Fancies, Impoverished Blood. Nervous Debility in all its Stages, Premature Decline, and all morbid conditions of the system arising from whatever cause. The action of the Phosphodyne is twofold-on the one hand increasing the principle which constitutes nervous energy, and on the other the most powerful blood and flesh generating agent known; therefore. marvellous medicine for renovating impaired and broken-down constitutions. It quickly improves the functions of assimilation to such a degree. that where for years an emaciated, anxious. cadaverous, and semi-vital condition has existed the flesh will rapidly increase in quantity and firmness, and the whole system return to a state of robust health. The Phosphodyne acts electrically upon the organisation; for instance, it assists nature to generate that human electricity which renews and rebuilds the osseous, muscular. nervous, membranous, and organic systems. It operates on the system without exciting care or thought upon the individual as to the process. It moves the lungs, liver, heart, kidneys, stomach, and intestines, with a harmony, vigour, yet

mildness unparalleled in medicine. The Phosphodyne gives back to the human structure, in a suitable form, the phosphoric or animating element of life, which has been wasted, and exerts an important influence directly on the spinal marrow and nervous system, of a nutritive, tonic, and invigorating character. maintaining that buoyant energy of the brain and muscular system which renders the mind choer ful, brilliant, and energetic, entirely overcoming that dull, inactive, and sluggish disposition which many persons experience in all their

The beneficial effects of the Phosphodyne are frequently shown from the first day of its administration, by a remarkable increase of nervous power, with a feeling of vigour and comfort, to which the patient has long been unaccustomed. -Digestion is improved; the appetite increases wonderfully; the bowels become regular; the eyes brighter; the skin clear and healthy; and the hair acquires strength, showing the importance of the action of the Phosphodyne on the organs of nutrition. Finally, the Phosphodyne maintains a certain

degree of activity in the previously debilitated nervous system; its use enables all debilitated organs to return to their sound state and perform their natural functions. Persons suffering from Nervous Debility, or any of the hundred symptoms which this distressing disease assumes, may rest assured of an effectual and even speedy cure by the judicious use of this most invaluable remedy.

DR. BRIGHT'S PHOSPHODYNE is sold only in Cases at 10s. 6d. by all Chemists and Patent Medicine Vendors throughout the Globe. Full Directions for Use, in the English, French, German, Italian and Dutch Lan-

guages, accompany each Case. CAUTION. - The large and increasing. demand for Dr. Bright's Phosphodyne has led to several imitations under somewhat similar names; purchasers of this medicine should therefore be careful to observe that each case bears the English Government Stamp, with the words Dr. Bright's Phose phodyne engraved thereon, and that the

THE American mail brings particulars of the great strikes of railway employés co. The latter appears to be a sequence of the former; but the details given in the papers are so voluminous and effectively mixed that it is almost impossible to get a clear idea of the proceedings. The disturbances seem to have commenced at Pitteburg, Pennsylvania, and Per Howsang, for Shanghai, 40 Chinese. to have rapidly spread along nearly all the great lines of railway. The cause of the strikes is stated by the employes to The British steamer Loudoun Custle re- be insufficient compensation for the support of the families of the strikers; their wages having been recently reduced. and can be told in a few words. A large portion of the wheat-producing land of California is a mere dust heap. The wheat crop is a total failure; and the result to railroading is obvious. No railroad company can long afford to run trains at a loss. They must use less cars, run less trains, reduce wages, or discharge portions of their employés, or, ere long, go into bankruptcy. is a hard case for the companies, as well as for the employes. Business has become temporarily so dull, in consequence of short crops, that it had been seriously proposed to cease all railroad construction for twelve months. And this will, quite likely, be decided upon, with the exception of finishing the new line from Bantas by the Bay shore Now, if our California railroad men thus feel the stringency of the dull times, it is not at all surprising that the Eastern roads, where there are so many competing for the carrying trade, should feel still more the necessity for economizing and reducing their expense

The chief rioting seems to have been at Pittsburg, Baltimore, and Chicago, the mob being fired upon in all these towns, with the result of considerable loss of life and injury.

The riots against the Chinese at San Francisco appear to have commenced on the 25th July, or six days after the first railway strike. On the afternoon of the day in question, hand-bills were au30 industriously circulated throughout the city, setting forth that the working men and women of the city would meet in near the new City Hall, to take action in China and Japan, S. A SOMEWHAT peculiar case was lately tried in the British Police Court at Shanghai. The defendant, a Master Mariner, was charged with having used profane language calculated to provoke a breach of the public peace; and his Counsel set up rather an ingenious defence. The trade being satisfied that the Foochow teas are exceptionally poor, there has been more disposition to look at black leaf. The only point that calls for some anxiety is that of the revenue; we are unfortunately not in a good position as regards income. It is a matter for considerable anxiety as to how we are to meet the expenditure of the year on which we are entering. We have only at the present moment a credit balance of \$56.85, and that only exists because we have availed of subscription which was raised among the Chinese, the balance of which is \$2,630, to meet expenditure which we were not able _ otherwise to cover.

Mr. SMITH: We have borrowed the money from that fund?

The CHAIRMAN: Yes; I do not know that we had any special obligation to do with it otherwise, because the Chinese have used the City Hall-the Museum part-very much, and a considerable portion of the money has been spent as the Chinese wished it to be expended in new cases for specimens and in various ways connected with the Museum. SUPREME COURT.

IN SUMMARY JURISDICTION. August 25, 1877.

C. C. Cohen v. D. McCulloch, 8620 .-This was a claim for damages for the nondelivery of 50 flasks of quicksilver, pur-

chased of the defendant on the 27th July Mr Johnson appeared for the plaintiff, and Mr Brereton for the defendant. iln opening the case for the plaintiff, Mr Johnson said the plaintiff was Mr Cohen, gentleman very well known and was a broker for several years here, and the defendant was Mr McCulloch, a gentleman connected with the firm of Messrs Turner & Co. This action arose out of a contract for the purchase of 100 flasks of quicksilver, 50 of which the defendant refused to deliver, and the claim was for damage in respect thereof at \$620, being the difference between the price of quicksilver at the date of sale and the price at the date of delivery. The contract was a verbal one. Mr SMITH: I propose that Mr Hoppius be | On the 27th July last, the plaintiff went to Messrs Turner & Co. to buy quicksilve and bought some from the firm. While there, Mr McUulloch, who himself had quicksilver to sell, spoke to him, and offered to sell some flasks to the plaintiff. The plaintiff then contracted to buy 100 flasks from him at \$66 per plcul. The defendant said he had not the quicksilver at present, Mr Snowden seconded the motion, which but that Mr Cohen could take delivery of it when he got it. In the course of the same day, Mr Cohen wrote to the defendant and the reply was that delivery could be had on the 31st July. On the

31st July, Mr Cohen wrote to Mr McCullock for delivery, and after one or two letters, Mr McCulloch sent two delivery orders, each for 50 flasks, to two Chinese. Mr Cohen sent these orders to his principal, the compradore of the Chartered Mercantile Bank, and two shroffs were sent to take delivery from the Chinamen, one going to eich. One of them got delivery and the money was paid for the same, but the other shroff could not obtain delivery, and it was for this non-delivery that the plaintiff was suing. Directly delivery could not be obtained of the second lot, Mr Cohen received a letter from the compradore, who wrote at the same time to Mr McCulloch. I only contracted with him to buy 100 flasks, and I was ready to take delivery at once, but he said it would not matter much for two or three days.

His Lordship said he could not understand the terms of the contract. Mr Brereton explained that Mr McCulloch had bought 100 flasks from two responsible parties, and his contention was that he only sold the bargain to Mr Cohen, who was to take the delivery orders, as Mr McCulloch did not wish to have any trouble.

A COSSACK CHARGE.

The correspondent of a contemporary gives the following account of a charge of Don Cossacks, which occurred before

Biela:-Early this morning (July 9) the 12th Don Cossack Regt., part of the brigade commanded by General Stahl von Holstein, which forms part of the 12th Cavalry Division, were leading the advance on Rustchuk, and riding along the road near this village, when they found their passage barred by two regiments of Turkish regular cavalry. Col. Cherkisaloff had but four squadrons with him, the other two being on flanking duty; but his orders were to clear the road, and the sturdy Cossack colonel gave the word to his Cossack children to follow him with that end. The ground prevented the superior numbers of the Turks from unflanking him, and with thrilling hurrahs they rode straight at the mass in front of them. The Turks also advanced, but at a trot, while the Cossacks. came on at a tearing gallop. There was a crash of lance and sword, and the Turks recoiled; but the Cossacks had not physical weight enough to put them to rout. Nevertheless, the two squadrons which charged first bore them back, and then the other two squadrops went in, and pushed the Turks further back, but these latter refused wholly to lose cohesion, and the cause of their stubbornness soon appeared. They wheeled and disclosed some companies of infantry and a couple of field guns that had come up in support. The blood of the Cossack colonel was up, but he was not brave without discretion. He sent back to General Arnoldi begging that he would support him with his dragoons, who can, as already described, act as infantry. Meanwhile the indomitable Cossacks hammered away lustily at the much superior force, delivering several distinct charges, successfully engaging the attention of the Turks till Bilderling brought up his dragoons at a gallop, followed by a hussar regiment. The dragoons dismounted, extended in skirmishing order, worked on through the broken ground on both flanks of the Turkish cavalry and infantry, and closed in just as the Cossaeks and hussars charged directly in front. The Turks would have no more of this kind of amusement. They fell back with precipitation, but the steadiness of their infantry covering the retreat prevented a rout or keen pursuit.

A NIGHT WITH THE STARS.

(Adolaide Observer.) Many a night I had passed in the company of stars, theatrical and otherwise, of greater or less magnitude; but on a certain evening not long since I wended my way towards the Melbourne Observatory, where for the first time in my life I was by the kind invitation of the Government Astronomer privileged to pass a night with the stars celestial. The building stands on a portion of the Government Domain not far from the new residence of the Governor. It lies in a secluded position at a considerable distance from the road, and thus that absolute quiet and freedom from the tremor produced on delicate instruments by the passing traffic of a city which are so essential to astronomical work are secured. The magnetic and meteorological instruments are numerous, and the best of their kind. As, however, they are such as are to be found in most observatories, and have already frequently been described in these columns, it is needless again

And yet ours is a glorious country. A marvelous. As a high-school girl would what the mighty genius of progress has wrought. But one short century ago the corner-stone of this mighty fabric was laid, amid the thunder of cannon and the rattle of musketry, canopied by the smoke of battle and cemented with blood. Our fathers died, but they had no railroads. If they had they might have died with less expense and trouble before they got to the war. Our fathers never knew the costatic pleasure of leaning out of a car window and getting a redhot cinder as big as a pea in their eye before they could look at a tree. They had no telegraph, and never knew what a convenience it was to pay forty cents to send a message fifty miles, and then have the dispatch come lagging a day or two after the man had died of old age. They had no kerosene lamps, and never knew what it was to light a kitchen fire and make a balloon ascension out every wash-day. Their wants were few and simple. They didn't need a great deal of weather, and what they had was regulated by the ground-hog, and that reliable weather-bureau never made a mistake.

These men have passed away. In their simple habits, their sterling honesty, their grand patriotism, their unselfish devotion to principle, they passed from life to eternal fame. The Fourth of July was invented by a man wh se name is dear to all American hearts -George W. Washington. By an ingenious arrangement the Fourth of July was so contrived by the inventor that it would always fall on a rainy day. -It has missed it only once in the past twelve hundred years, and on that once it hailed all day. The Fourth of July was not the only invention of this great and good man. invented a name that will fit two-thirds of the boys of every generation in America. A grateful people never forgot the fact, and Washington, when at the zenith of his power, was nominated by acclamation for the capital of the United States. Washington was once discovered praying at Vailey in these days.

If he can't find a roaring billow, I'll be perfectly satisfied to have him chucked into a creek. And I dare say that it'll make no material difference whether the dolphing gobble him or the catfish and cels nibble him up. It's all the same in the long run. Mention this to your murderer when you speak to him, will you? Now, I'll show you why this thing takes all the heart out of me. In his poem entitled "Longings" he uses this language :

Oh sing to me, darling, a sweet song to-night; While I bask in the smile of thine eyes. While I kiss those dear lips in the dark silent

And whisper my saddening good-byes."

Now, you see how it is yourself, Grady. don't you? How is she going to sing to It him while he kisses those lips, and how is he going to whisper good-bye! Isn't that awful slush? Now, isn't it? And then, deep, and maybe fill him up with poison or something to make it absolutely certain.

Destroy this poet, future generations will praise your name. When the poems cease to come to mo. I will know that he is dead. That will settle it. Good-morning.'"

It is believed that the poet must have been warned by Grady, for the supplies auddenly ceased; and Markley is saving up his effusions for some other victim.

According to the Temps the military authorities of France have decided upon issuing an order sanctioning the wearing of spectacles by the officers and men of the French army. In Germany spectacles have long been worn by both officers and men in the ranks, It is recognized as essential that an officer should be able to see his men, and that these latter should be able to clearly distinguish the target at which they have to fire; and therefore, unless spectacles or eye-glasses are permitted. every short-sighted man must be excluded from the army. Consequently by allowing a man to assist his defective vision by artificial means a large number of men who are at present necessarily rejected will become available for service in the ranks.

THE Company will be constituted on the 1st January, 1878, as a permanent Marine Insurance Company, to carry on the business (established in 1863) of the NORTH CHINA INSURANCE COMPANY.

A Reserve Fund will be formed of Taels 400,000, by setting aside a portion of the profits at such times and in such sums as

the Shareholders shall decide. The net profits of the Company for each year will be divided amongst the Shareholders, in the following manner :---

One-third over the Shares, a portion thereof being set aside for the formation of a Reserve Fund as above stated. Two-thirds as a return to Contributors (being Shareholders), in proportion to

the Premia paid or influenced by them. A revision of the Share List will take place at the end of every three years, and for this purpose power will be given to the Directors by the Deed of Settlement to withdraw at the before-mentioned periods all or any of the Shares held by Shareholders who have not contributed Premia or whose contributions during the preceding three years have not been in proportion to the number of Shares held.

Shareholders retiring from the Company in pursuance of the above regulation, will be notified at least three months prior to the date fixed for any such revision of the Share List, and will have the option of disposing of their Shares in either of the Discount of 20% on the Premis

They will be at liberty at any time after receipt of notice of withdrawal, and prior to the date of revision, to sell their Shares to any person approved by the Company and accepted as the

transferee : Upon surrendering their scrip certificate for cancellation at the time of such revision, and pursuant to notice, will receive a return of the Capital paid up thereen; and so soon after as the financial position of the Company up to the date of the revision can be ascertained and the accounts adjusted, they shall also receive a pro-rata share of the Reserve Fund, if any accumulated, together with such proportion of the unappropriated profits as may be found

due to them. Notice is HEREBY GIVEN, that Applications for Shares in the undermentioned form will be received at the offices of the Company, from residents in China and Japan, until the 80th September; from London and distant ports until 31st October next.

CHINA REVIEW.

THE widely-expressed regret at the discontinuance of Notes & Queries on China and Japan, has induced the publishers of this journal to issue a publication similar in object and style, but slightly modified in certain details.

THE CHINA REVIEW, or Notes an Queries on the Far East, is issued at intervals of two months, each number con taining about 60 octavo pages, occasionally illustrated with lithographs, photographs woodcuts, &c., should the papers published demand, and the circulation justify, suc extra matter.

The subscription is fixed at \$6,50 postage paid, per annum, payable by non-residents

in Hongkong half-yearly in advance. The publication includes papers original and selected upon the Arts and Sciences, Ethnology, Folklore, Geography, History, Literature, Mythology, Manners and Customs, Natural History, Religion, &c., &c., of China, Japan, Mongolia, Tibet, the Eastern Archipelego and the "Far East' generally. A more detailed list of subjects upon which contributions are especially invited is incorporated with each number. Original contributions in Chinese, Latin, French, German, Spanish, Italian or Portuguese, are admissible. Endeavours are made to present a resume in each number of the contents of the most recent works bearing on Chinese matters. Great attention is also paid to the Review

department. Notes and Replies are classified together as "Notes" (head references being given, when furnished, to previous Notes or Queries), as are also those queries which, though asking for information, furnish new or unpublished details concerning the matter in hand. It is desirable to make the Queries proper as brief and as much to the point as possible.

The China Review for July and August, 1875, is at hand. It says that forty-two essays were sent in to compete for the best paper on the advantages of Christianity for the development of a State. All our learned societies should subscribe to this scholarly and enterprising Review. It is a sixty paged, bi-monthly, repertory of what scholars are ascertaining about China. The lecture on Chinese Poetry in this volume is alone worth the price of the Review. Address China Review, Hongkong.-Northern

Christian Advocate (U.S.) Trübner's Oriental Record contains the following notice of the China Review !-- "This is the title of a publication, the first number of which has lately reached us from Hongkong, where it has been set on foot as in some respects a continuation of Notes and Queries on China and Japan, the extinction of which useful serial a year or two ago has been much regretted in Europe as well as in China. The present publication, judging by the number now before us, is intended to occupy a position, as regards China and the neighbouring countries, somewhat similar to that which has been filled in India by the Calcutta Review. The great degree of attention that has been bestowed of late years upon the investigation of Chinese literature, antiquities, and social developments, to say BOOKS BOUND IN APPROVED nothing of linguistic studies, has led to the accumulation of important stores of information, rendering some such channel of publicity as is now provided extremely desirable; and contributions of much interest may fairly be looked for from the members of the foreign consular services, the Chinese Customs' corps, and the missionary body, among whom a high degree of Chinese scholarship is now assiduously cultivated, and who are severally represented in the first number of the Review by papers highly creditable to their respective authors. a paper on Dr. Legge's She King, by the Rev. E. J. Eitel, to which the place of honour is deservedly given, an excellent summary is presented of the chronological problems and arguments involved in connexion with this important work. Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese post-statesman of the eleventh century, Su Tung-p'o, by Mr. E. C. Bowra, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Review, if carried out with punctuality and detail, we are glad to notice that "Notes" and "Queries" are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zeal to that which was displayed during the lifetime of its predecessor in the field, and that the China Review may receive the support necessary to insure its continuance. The publication is intend-Half hour, 10 ets. | Hour, 20 ets. ed to appear every two months, and wil

THE CHINESE MAIL. This paper is now issued every day. The subscription is fixed at Four Dollars per annum delivered in Hongkong, or Seven Dollars . "ifty Cents in-

cluding postage to Coast ports. It is the Arst Chinese Newspaper ever issued under purely native direction. The editorial department is conducted Mr Chun Ayln, whose experience competence have already been most fully demonstrated. The chief support of the paper is of course derived from the native community, amongst whom also are to be found the guarantors and securities necessary to place it on a business and

legal footing. The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,from Australia, California, Singapore, Penang, Salgon, and other places frequented by the Chinese, -- consider themselves justified in guaranteeing an ultimate circulation of between 3,000 and 4,000 copies. The advantages offered to advertisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of

The field open to a paper of this description-conducted by native efforts, but progressive and anti-obstructive in tono-in almost limitless. It on the one hand commands Chinese belief and interest while on the other deserves every aid that can be given to it by foreigners. Like English journals it contains Editorials, with Local, Shipping, and Commercial News and Advertisements. Subscription orders for either of the

Mails exchanged with Manila and Saigon. The Philippine Islands being now admitted into the General Postal Union, it follows that all paid correspondence received from Manila in the mails will be delivered free by this Office, and that all paid correspondence sent to Mapila in the mails should be delivered free there.

Article IX of the Postal Treaty of Berne provides that " Neither the senders nor the addressees of letters and other postal packets shall be called upon to pay, either in the Country of Origin, or in that of Destination, any tax or duty other than" the recognised rates levied (in the case of paid correspondence) by the despatching Office. It is hoped that any extra charge, or apparently extra charge, will at once be brought to the notice of the proper

authorities, in either Colony. The above does not apply in any to loose letters sent outside the mails. These will always be charged on artival in Hongkong and probably the Manila Office will adopt or Turkey, when sent by Franch Panket, the same source,

Complaints are sometimes received of nust be above 18 inches in length, width, extra charges on correspondence exchanged between this Colony and Salgon, but it is believed it would be found in all cases that the letters, do., had been sent loose. They must not be of intrinsic value. Any Foreign stamps on toose corre-

spondence are obliterated in this Office. Indian Correspondence. Unpaid Letters are not received for the Indian Mail Packeta.

The Pre-payment of correspondence for the Straits, India, Ceylon, and Aden is compulsory by whatever opportunity it is forwarded.

Registration to Bangkok. Her Britannic Majesty's Consul General for Siam has been good enough to make arrangements by means of which correspondence can be Registered to Bangkok, at the usual charge of 8 cents.

It follows that, to forward Correspon dence to Batavia with the least delay, the following are the best opportunities: In the S. W. Monsoon.

The English Mail. The French Mail. In the N.E. Monsoon.

A Private Steamer a few days before the English Mail. The French Mail.

The Post Office is not, by law, responsible for any loss or inconvenience which may arise from the non-delivery, mis-sending, or mis-delivery of any letter, book, or other postal packet (even if the packet be registered); nor is the Post Office responsible for any injury which a packet may sustain during its transmission.

To guard against such injury all postal packets which are likely to suffer from stamping or from great pressure should be placed in strong covers; and even with this precaution no fragile article should be sent through the Post. It should be remembered that every packet has to be handled several times; that it is exposed to considerable pressure and friction in the mail bag; and that, whenever the bag has in the course of its transmission to be transferred by means of the railway apparatus, the risk of injury

is much increased. No information can be given respecting letters which pass through a Post Office except to the persons to whom they are addressed; and in no other way is official information of a private character allowed to be made public. A Postmaster may, however, give an address if he has no reason to believe that the person whose address it is would disapprove of his doing so.

Postmasters are not allowed to return any letter or other packet to the writer or sender, or to any one else, or to delay forwarding it to its destination according to the address, even though a request to such effect be written thereon.

Postmasters are not bound to give change, nor are they authorised to demand change and when money is paid at a Post Office, whether as change or otherwise, no question as to its right amount, goodness, or weight can be entertained after it has been removed from the counter.

Postmasters are not bound to weigh any letters or other packets for the public, but they may do so if their duty be not thereby

The practice of sealing letters passing to and from the East and West Indies, and other countries with hot climates, with wax (except such as is specially prepared), is attended with much inconvenience, and frequently with serious injury, not only to the letters so sealed but to the other letters in the mail, from the melting of the wax and adhesion of the letters to each other. The public are therefore recommended, in all such cases, to use either wafers or gum, and to advise their correspondents in the countries referred to, to do the same.

The registration of a packet makes its transmission much more secure, inasmuch as, under ordinary circumstances, a registered packet can be traced through its whole course; and thus the loss of a registered packet is a very rare occurrence. Nevertheless large sums of money or other articles of great value should not be sent through | be given if the order be crossed (as cheques the post, even if the packet be registered; as | are crossed). It can then be paid only the machinery of the Department is not through a Bank, and may afterwards be arranged with a view to such transmission. duty on this point will be called to strict on payment of an additional commission. and the Department cannot in any way Order Office for instructions. undertake the safe conveyance of such packets. All inland or colonial letters, therefore, which contain coin, and jewellery, even though they be posted without registration, are treated as registered, and charged on delivery with a double registration fee of eightpence in addition to the ordinary postage; and any such letters which cannot be registered in time to be forwarded by the Mall for which they are posted are detained for the next despatch. Even if the letter do not contain any article

of intrinsic value, it should, if it be very important, be registered.

Most countries to which Hongkong forwards Correspondence having joined the General Postal Union or being probably about to do so, it is necessary that the following rules be strictly observed:

1. No Letter or Packet, whether to be registered or unregistered, can be received for Postage if it contains gold or silvermoney, jewels, precious articles, or anything that, as a general rule, is liable to Customs

2. This Regulation prohibits the sending of Patterns of dutiable articles, unless the quantity sent be so small as to make the sample of no value.

3. The limits of weight allowed are follows :--Books and Papers—to British Offices

5 lbs.; to the Continent, &c., 2 lbs Patterns-to British Offices, 5 lbs. if with out intrinsic value; to the Continent &c., 8 oz. 4. The following articles cannot be sen

by Post at all: Glass, Liquids, Gunpowder Matches, Candles, Soap, Indigo, Dye-stuffs or whatever is dangerous to the Mails, o offensive or injurious to persons dealing with them. PARCELS.—The public is reminded that

in China and Japan, there is no such thin as Parcel Post. Much trouble and disap pointment is caused by persistent attempt to send small valuable trifles through th Post. Fans, Curios, Articles of Dres Fancy Work, and similar presents are con tinually being refused, the senders having often spent more in Postage than would have paid the freight by steamer. I refund can be made on such parcels of th value of Stamps obliterated before th nature of the contents was discovered.

PATTERNS. - Some difficulty is experience in obtaining a general understanding what is a Pattern. It is a bond fide samp of goods which the sender has for sale. of goods which he wishes to order. It to consist of the smallest possible quantit compatible with shewing what the good are, and must have no intrinsic value.

To provide means of remitting am sums of money to or from this Colony ar between the Ports of China and Japan, th Postmasters and Agents of this Office w. in future be allowed (but not required) purchase Hongkong Postage Stamps from foreign residents.

Between Hongkong and Shanghai, Hongkong and Yokohama, however, either direction, Money-Orders must used.

The Stamps tendered for sale must no exceed \$25 in value, must be perfect clean, in good condition, and in strips of least two, as no separate Stamps will purchased. They must be presented pe sonally or accompanied by a note. The Postmaster or Agent may postpo

purchasing if his public funds in hand a not sufficient, and he will refuse to purcha in any case which appears doubtful or suspicious. He is allowed to charge a Commission of one per cent on all Stamps purchased.

Letters containing Stamps should be Registered, and the Stamps should be secured from observation.

During the N.E. Monsoon, the Charterers and Agents of sailing ships for Manila Saigon, Bangkok and Singapore are requested to give notice to this Office of the departures of such ships. No correspondence will be forwarded by

sailing vessel but such as is specially so Correspondence for New Zealand may be | Chambrun Prince | forwarded via Torres Straits when specially

directed for that route, otherwise it will be ! Cheang Hock sent by way of Galle. Money Order Regulations.

1.—Money Orders on the United Kingdom are issued at Hongkong, Shanghai and Yokohama. Shanghai and Yokohama also issue on Hongkong and vice versa.

2.—Small sums may be remitted between the other Ports by means of Postage

3.—Many Money Orders are supplied to residents at the smaller Ports in this way. An application for an order* is filled up, and is enclosed with a stamped, directed, and unsealed envelope to the Postmaster a the nearest issuing office. The application must be accompanied with the full amount (including commission) in cheque, postage stamps, or other equivalent of cash, and a little margin should be left for variations of exchange. The Postmaster issues the order, sends it on in the envelope, and returns the change, if any, by first opportunity, with a receipt for the letter, if it were to be registered, as it always should be. Care should be taken to send these applications in time, as the Money Order Offices close some hours before the departures of the mails.

4 .- No order must exceed £10, or include any fraction of a penny. Orders will be drawn at the current rate of the day! and paid at the rate of the day when the advice arrived.

The commission is as follows :---Orders on the United Kingdom. Up to £2..... 18 cents. £5..... 86 ,,

£10......72 ,, Local Money Orders. -. 50......30 5 .- Lists of Money Order Offices in the United Kingdom may be consulted at

Hongkong, Shanghai, and Yokohama. 6 .- Names must be given in full (expect when there is more than one Christian name) but the name of the Payee need not

specially crossed to any Bank. By law, the Post Office is not responsible 7 .- No order can be paid till the Pavee for the safe delivery of registered packets; have signed it in the proper place. An though any officer who may neglect his order can be transferred to another office account. Sent in unregistered letters, valu- In case of loss of an order, necessity for able articles are exposed to risk, and offer a stopping payment, or the like, application temptation which ought not to be created; should be made to the nearest Money

8 .- If the order be not presented within six months an additional commission will be charged; if not within twelve months, inland letters which contain watches or the money will be forfeited. When the order is once paid no further claim can be entertained.

> 9.—No order can be paid until the advice relative to it has been received.

Made out on a printed form which is supplied + Orders on Shatighal are drawn at 2 per cent. premium in all cases.
